linkedin.com/in/ali-aauicha/ · github.com/aliaaauichaa

Cloud & AI Developer with three self-built applications in production on AWS (web, PWA and mobile app), Stripe payments and integrated generative AI. I come from operations and supply chain, where I learned to solve business problems with data.

EXPERIENCE

2026 – Present

Personal Projects | Cloud & AI Developer

Design, development and operation of three products in production, with real users:

- **Quillaflow** (quillaflow.com) — workforce management for small businesses: role-based users, real-time collaboration, client portal, email/SMS notifications and an Android/iOS app built with Capacitor. In daily use by a real client. Cognito, Lambda, API Gateway, S3, CloudFront, SES/SNS. Mobile app code: github.com/aliaaauichaa/quillaflow-mobile-capacitor.
- **Mi Campo con IA** (micampoconia.com) — farm management: plots, costs, workdays, irrigation, stock, official market prices (Spanish Ministry of Agriculture and regional governments) and satellite NDVI; ready for IoT sensors. Supabase/PostgreSQL with RLS on Lightsail and 18 Lambdas (WebSockets, ETL, Cognito). Own community of 1,500+ Instagram followers ([@micampoconia](https://twitter.com/micampoconia)).
- **ShootingStats** (shootingstats.site) — football statistics for dozens of leagues: PWA in three languages with 800+ generated SEO pages, Stripe subscriptions (Checkout, webhooks, DynamoDB) and a Lambda + EventBridge data pipeline that pre-computes and publishes a bundle to S3/CloudFront.

Serverless architecture on AWS, assistant powered by the Claude API (Anthropic) behind a Lambda proxy, scripted deployments, CloudWatch and cost control. Claude Code as a development assistant. Google Analytics 4 on all three products and Search Console on Mi Campo, with page titles rewritten from CTR and position data. On ShootingStats, a Lambda backend queries the GA4 Data API to show per-user usage time in the admin panel, Telegram links tagged with UTM and active users up 272% in 30 days; live dashboards available to walk through at interview.

04/2024 – 08/2026 · Barcelona

Grupo Sesé | Supply Chain, Logistics and Traffic Analyst

Stock and material supply chain management for automotive assembly lines. Reports and statistical analysis for data-driven decisions, bottleneck identification and continuous improvement with Lean and Six Sigma.

06/2022 – 04/2024 · United Kingdom

Paack | Lead Operations Analyst

Point of contact for daily cost control in the North of the United Kingdom. Real-time monitoring of delivery routes and warehouse operations (WMS), financial and KPI analysis, and coordination with suppliers and internal teams meeting 100% of targets.

06/2021 – 05/2022 · United Kingdom

Fluiconnecto | Operations and Logistics Analyst

Stock management, performance reports and statistical models. Process analysis to fix inefficiencies, order quality control and logistics KPIs for management.

EDUCATION

Formal education

- **Master's Degree in Economic and Business Analysis (Bilingual)** — University of Málaga, 2020
- **Bachelor's Degree in Political Science and Administration** — University of Granada, 2018
- **International Studies, Politics and Economics (Erasmus+)** — [Łódź University](https://www.lodz.pl), Poland, 2017

Courses and certifications

- **Master's Degree in SAP BTP, S/4HANA and AI** — EuropeanBTech, 2026
- **AWS re/Start (Graduate)** — Amazon Web Services, 2025
- **AWS Data Analytics Fundamentals** — Amazon Web Services, 2025
